"To serve our customers and community more effectively than anyone else by treating our customers, co-workers and suppliers as we, personally, would like to be treated."

To Whom It May Concern:

Kwik Trip was looking for an automated V/F/F/S machine for packaging hot filled soups. Tough thing about this application is the equipment operates in a 45 degree environment that goes through a clean-up process everyday. A few equipment suppliers "thought" their machine would perform under these circumstances. Rick Leonhard and his team had previous experience with food applications and were the logical choice.

The support from Viking Packaging Technologies has been excellent. As we ran production, the machine enhancements that the team at Viking developed and installed on our machine, gave us a higher production rate, but more importantly, improved quality.

Thanks again for your support!

Respectfully,

Project Manager
Kwik Trip
