

## Rotary Premade Pouch Machine **QUADRUPLEX MODELS**

**Maximize your ROI with a simple but powerful packaging solution.**

Quadruplex rotary automatic pouch packing machines feature two or four lanes for maximum throughput. Great for a variety of products including liquids, solids, and powders, the rotary premade pouch machine will enable your business to scale up quickly.

### features

- Allen Bradley servo-drive control platform
- PLC with color touch screen
- Durable welded steel frame
- Production parameter memory including gripper size, machine speed, sealing temperature, and filling volume
- Pouch presence detection: No pouch = No filling or sealing
- Bag deflation
- Automatic deoxidizer feeding station
- Two-step sealing process

### options

- Robotic pick & place infeed system
- Integration with multi-head scales; volumetric, auger, or liquid fillers
- Fully interlocked safety guards
- Presealing station for liquids
- Zipper opening device
- Extended bag magazine
- Date coding
- Integration with checkweighers and metal detectors
- Dust suction nozzles and dust collector hood
- Product settler
- Ethernet connectivity
- Washdown design (IP65 or IP66)
- Gash flush
- Bag rejection station
- Modified discharge configurations
