Servo-driven, stainless steel intermittent motion packaging solution quickly forms, loads, and closes wraparound cartons.

### MAX SPEED

25 cpm

### BAG SIZE (MAX)

400 x 600 x 350 mm

### BAG SIZE (MIN)

75 x 110 x 50 mm

# Packaging machine CAM-W – wrap-around cartoning machine for transport packaging

CAM-W brings reliable automation to secondary packaging - wherever precision, product protection, and elegant product presentation are important.

A complete carton or tray, with or without a lid, is created by CAM-W, a wrap-around cartoning machine. In a single cycle, it builds, fills and seals the packaging with hot glue, focusing on precision, reliability and an aesthetically clean finish.

It is designed for the secondary or tertiary packaging of products for transport or sale, where strength, protection and efficient handling are paramount. Optional palletizing integration enables the entire process to be incorporated into a fully automated packaging line.

## Features

Intermittent motion

Hot melt systems

Easy format change over

Inclined carton magazine

Controlled carton supply

Servo drives

Rugged stainless steel construction

Vacuum pump included

Jogging control

Safety guarding

Off-the-shelf components

Siemens or Allen Bradley controls

Excellent accessibility

Ergonomic design

IP54 rating

Intuitive touch screen human interface (HMI)

## Options

Configured for cases, trays with or without lid or wraparound style cartons

Various styles of closure systems

Fully motorized size change over

Damaged carton rejection

Open flap rejection

Different frame sizes to accommodate large carton size range

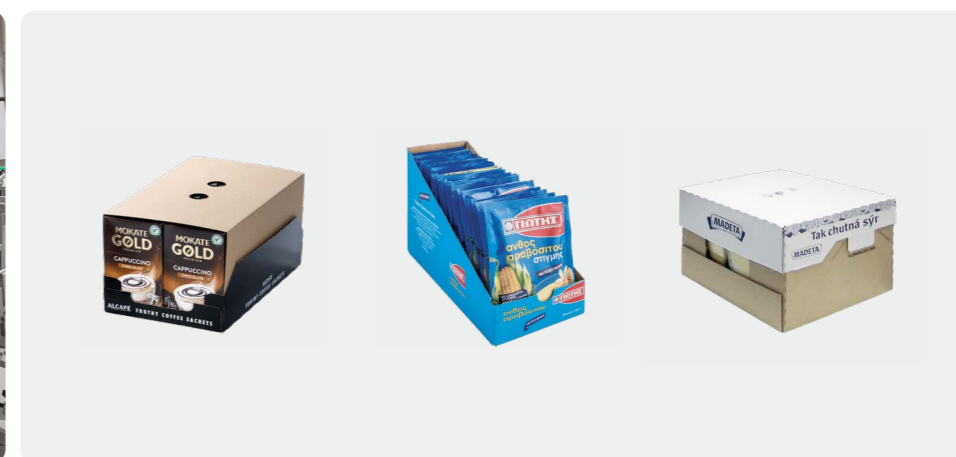

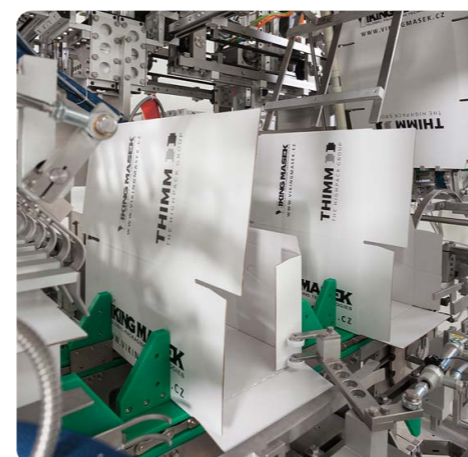

Remote diagnostics

Extended carton magazine

Special electronics and voltages

IP65 washdown construction

Various types of feeders
